

Abdullah bin Harun (Dol)

Full-Stack Developer — Blazor & .NET

abdullahharun96@gmail.com · +60 19-635 9384 · Kg. Baru Jenderam Hilir, Dengkil, Selangor ·
frankyf2.github.io/Resume

SUMMARY

Computer Science graduate (UiTM Shah Alam, April 2026) currently working as a Full-Stack Developer at Puncak Nilam Management Sdn Bhd (PNMS), building and maintaining Blazor Server (.NET) platforms — most notably MIRAR's training and compliance system — alongside personal projects in Python, Flask, and PHP. Certified in AI/NLP fundamentals, with hands-on experience across UI/UX design, web development, and applied machine learning.

SKILLS

C# / .NET · Blazor Server · Java · Python · PHP · HTML / CSS / JS · Django
MySQL / EF Core · JavaDB · Bootstrap · Cloudflare · Docker · Figma · Adobe PS

EXPERIENCE

Full-Stack Developer — Puncak Nilam Management Sdn Bhd (PNMS)

2025 – Present · Current

- Build and maintain Blazor Server (.NET) platforms, including MIRAR's certificate, quiz, and survey systems.
- Design and ship admin tooling, member portals, and risk-intelligence dashboards used in production.

Web Designer — SULAM at UiTM

2025

- Designed the layout and UI/UX structure of a website for the development team; translated design concepts into working pages using Figma and HTML/CSS wireframes.
- Ensured responsiveness and accessibility across screen sizes.

Internship — Kurnia Diyari Sdn. Bhd.

2022 – 2023

- Gained hands-on experience across software programs; provided project progress updates and proposed solutions to issues.
- Presented project goals and outcomes, improving cross-team understanding.

EDUCATION

Bachelor of Computer Science — Universiti Teknologi MARA, Shah Alam

2023 – April 2026 · GPA 3.39

Diploma of Computer Science — Universiti Teknologi MARA

2020 – 2022 · GPA 3.52

CERTIFICATES

- Natural Language Processing and Computer Vision — SULAM, UiTM (2024)
- IBM watsonx.ai Technical Essentials — IBM (2024)
- Introduction to Artificial Intelligence — IBM (2024)

SELECTED PROJECTS

- **MIRAR Platform** — enterprise training/compliance system (Blazor Server, MySQL): certificates, quizzes, surveys, admin & member portals.
- **iSusun** — open-source, self-hosted Kanban board (Blazor Server, Docker).

- **Automated Resume Screening System** — Django/spaCy/TF-IDF tool matching resumes to job descriptions with an admin review panel.
- **Flag Detector** — ML image-classification web tool built in Google Colab (Python).
- **BizHub (SULAM Project)** — admin dashboard for a village business directory site (HTML/CSS/JS).
